Design Structure Matrix for Software Systems

details will come later, for now quick resources and some pics

NOV Worksheet Template

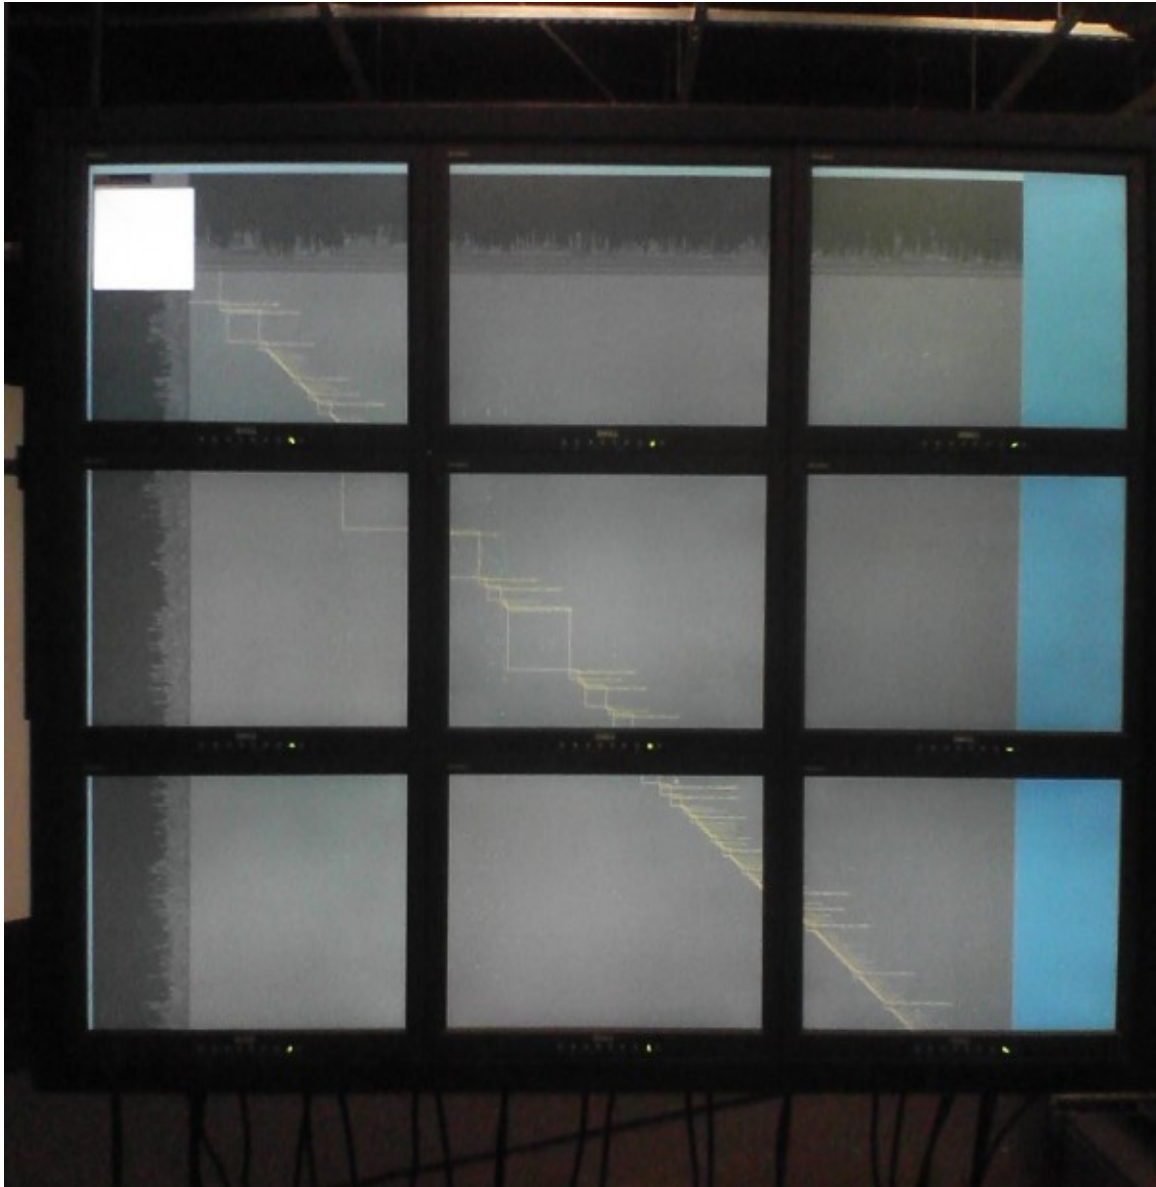

DSMs can be used for assessing design options along with the quantitative model of Net Options Value. Here is a sample worksheet in MS Excel for doing such analysis.

noa-nov-template.xls

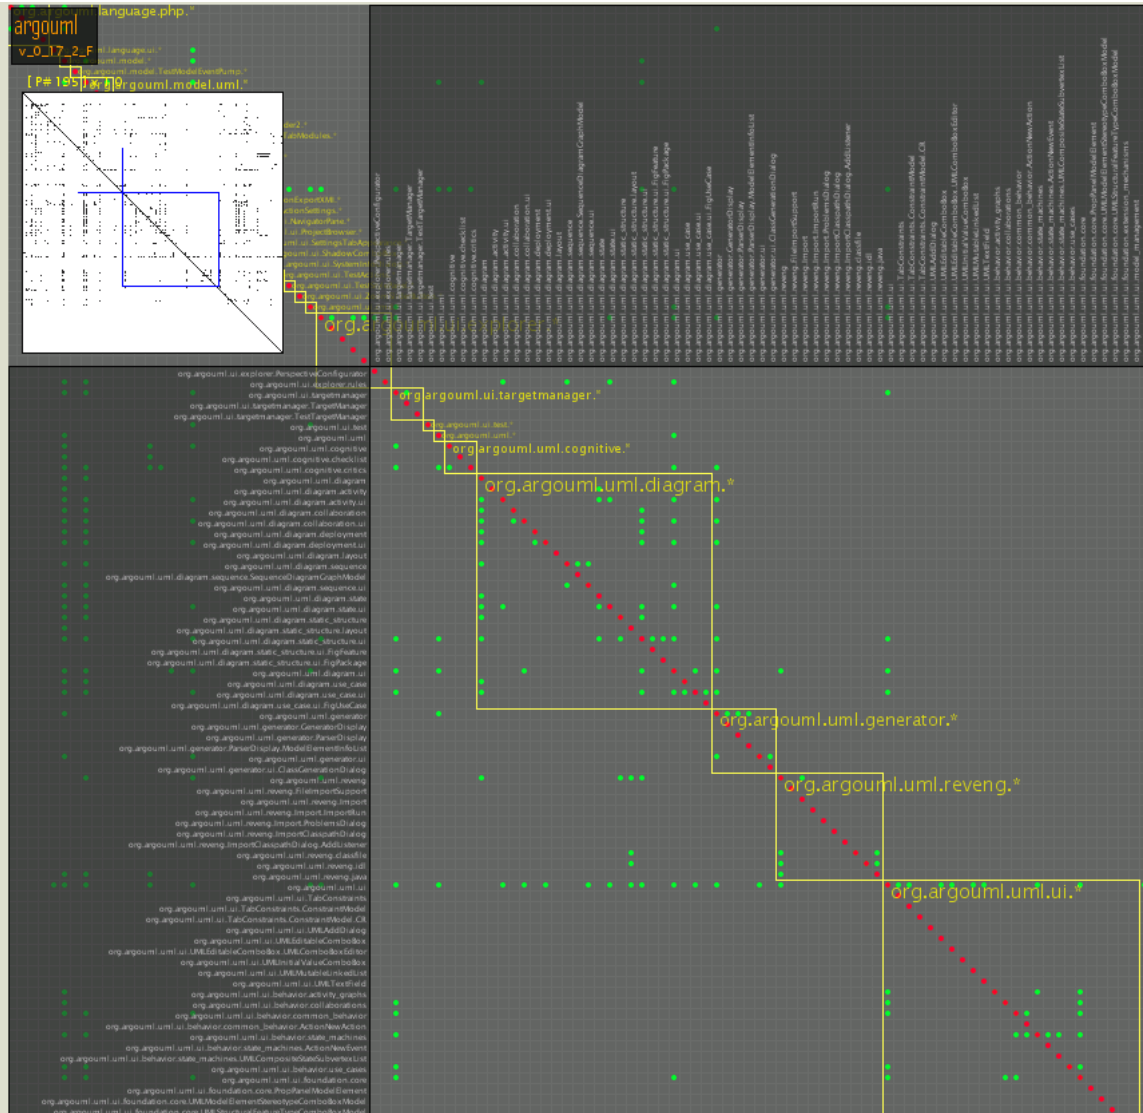

For a detailed description of using the methodology of using DSM/NOV for assessing software design options you can refer to this [paper](#) and other references given in there.
